pages

Praise for Equality and Transparency

- "*Equality and Transparency* is an erudite and analytically innovative study of affirmative action. It is particularly original and incisive in its treatment of the problematic aspects of the "diversity" rationale. I do not know of a more balanced and comprehensive treatment of the subject."

--George M. Fredrickson, Edgar E. Robinson Professor of United States History Emeritus, Stanford University

- "From the time America's Constitution-makers protected slavery without daring to use the word, the nation's leaders have often engaged in euphemism and misdirection when trying to maintain and trying to transform the nation's pervasive patterns of racial inequality. Daniel Sabbagh's incisive study shows how today's Supreme Court continues that pattern, not daring either to end racial affirmative action or to embrace openly all the reasons why it is still needed. A superb book."

--Rogers M. Smith, Christopher H. Browne Distinguished Professor of Political Science, University of Pennsylvania

Table of contents

Introduction	1
Part One: Assessing Justifications for Affirmative Action	11
The Corrective Justice Paradigm	13
The Diversity Paradigm	31
A Strategic and Consequentialist Perspective: Affirmative Action as an Instrument for Deracializing American Society	49
